Drive Mode: Cadence Sensing
Pedal Assist, Trigger Throttle
Top Speed: 20mph (32kph)

Weight: 66lbs
Fork: Hydraulic 4" Travel Inhibitor

*Suspended seat post - Takes the shock out of the big bumps, without the cost or complexity of rear suspension.

*Adjustable handlebar stem- Provides up to 1 1/2" of rise and reach adjustment, for fully customizable riding position.

*Upgraded Shimano Alivio derailleur- Rigid cast aluminum construction gives smoother, more precise shifting,

*New improved "comfort" seat

*New Techtro hydraulic DISC brakes

*New gearing, with taller top gear for relaxed touring, plus a lower low gear for tight, technical riding.

*New programming in the assist levels. With 9 levels to choose from, you can find one applicable to any 0-32kph riding condition.

*New lower standover height, less intimidating for shorter riders, and easier to dismount when the going gets ugly off-road.

*New Sportier lightweight detachable fenders front and rear
